1. The list of customers should be based on the the criteria from step 1 . Example: if 2011 is passed and there is a customer with that id that should be the customer shown in the list.

2. If in step 1 was passed a keycode, the campaign could be retrieved from it. In Campaign list that campaign should be chosen by default. otherwise choose the 'No Order Form/Reorder' campaign.

Q: how to get the list of campaigns to show in the dropdown?

Jim Bob

< Back Next >

1. Order type will be chosen by default based on the logged in user. Example if the logged in user is an outbound user. 'Outbound' option should be chosen by default, however, user should be able to change it if needed.

Q: could you remind me the type of users and how they are matched with the order type?

2. Logged in user

Q: should we allow to edit attention to and ordered by inputs? if so, what is the list of users to shown there?

I did remove from this step the address inputs because IMO they fit better in the payment step, I have seen them at this way in several sites, however, it can be changed.

User would have the option to search products and see a list of them before adding it. It could use the search feature to filter them and then add the one needed.

2. What about adding in selected products table the price? I think it could be useful
